 - a. **Nature of Activity**: Describe the overall activity or project. Give appropriate dimensions of structures such as wingwalls, dikes (identify the materials to be used in construction, as well as the methods by which the work is to be done), or excavations (length, width, and height). Indicate wether discharge of dredged or fill material is involved. Also, identify any structure to be constructed on a fill, piles, or float-supported platforms. The written descriptions and illustrations are an important part of the application. Please describe, in detail, what you wish to

- do. If more space is needed, attach a separate sheet marked "Box 5 Nature of Activity."

2) Box 6:

- a. Corps jurisdiction consists of waters of the U.S. Waters of the U.S. are defined under 33 CFR part 329 as "navigable waters of the United States" and/or under 33 CFR part 328.3(a) as "waters of the United States." Under Section 404 of the Clean water Act, either the ordinary high water mark (non-tidal) or the high tide line (tidal), as well as any adjacent wetlands, demarcate waters of the U.S. Under Section 10 of the Rivers and Harbors Act, either the mean high water mark (tidal) or the ordinary high water mark (non-tidal), as well as any adjacent wetlands, demarcate waters of the U.S. Wetlands are identified and delineated using the methods and criteria established in the Corps Wetland Delineation Manual (1987 Manual) (i.e., occurrence of hydrophytic vegetation, hydric soils and wetland hydrology). The term "adjacent" means bordering, contiguous, or neighboring. Wetlands separated from other waters of the U.S. by man-made dikes or barriers, natural river berms, beach dunes, and the like are also adjacent.
- b. **Required drawings**: Submit one legible copy of all drawings (8 1/2 x 11-inch or 11 x 17-inch) with a 1-inch margin around the entire sheet. The title box shall contain the title of proposed activity, name of water body, county, city, date, and sheet number.
 - i. Vicinity map: Cover an area large enough so the project can be easily located, include arrow marking the project area, Identifiable land marks, name or number of roads, north arrow, and scale.
 - ii. Plan view: Include existing bank lines, ordinary high water mark line(s), average water depth around the activity, dimensions of the proposed project, dimensions of any structures immediately adjacent to the proposed activity, north arrow, scale.
 - iii. Elevation and/or cross-section views: water elevation as shown on plan view drawing, dimensions of the proposed project, dimensions of any structures immediately adjacent to the proposed activity, scale
- 3) Box 14: You may need State water quality certification from the appropriate state or tribal agency (e.g., Regional Water Quality Control Board for non-tribal California lands). You need not have obtained water quality certification before applying for a Corps nationwide permit verification.
- 4) **Box 15:** You may need a federal coastal consistency certification under the Coastal Zone Management Act from the appropriate state agency (e.g., California Coastal Commission for California Coastal Commission). You need not have obtained federal coastal consistency certification before applying for a Corps nationwide permit verification.
